DETAILED ACTION

Claims 1, 5, 15-16, 18-20, and 72 are currently pending and are present for examination.

Applicants' amendments and arguments filed on 4-9-04, have been fully considered and are deemed to be persuasive to overcome the rejections previously applied. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. Specifically Examiner has withdrawn the previous rejection of claims under 35 U.S.C. 103(a) as obvious over Akihiko et al. and Kuehn et al. since the reference of Kuehn et al. teaches the use of glucose-1-phosphate and a nucleotide triphosphate for synthesis of the sugar nucleotide as opposed to the requirement of plain glucose claimed in instant claims.

Examiner has entered the claim amendments wherein applicant has replaced the phrase "culture broth" with "culture" without raising any new matter issues as claim 1 clearly differentiates between the "culture supernatant" and "the cells obtained by centrifugation". Similarly, Examiner has also not raised any issues regarding the inclusion of the phrase "wherein the treated product continues to have the same enzymatic activity...." since claim 1 implicitly has the support for such a phrase.

Drawings

Drawings submitted in this application are accepted by the Examiner for examination purposes only.

Allowable Subject Matter

Claims 1, 5, 15-16, 18-20, and 72 are allowed.

Art Unit: 1652

The following is an examiner's statement of reasons for allowance: Following a diligent search it was determined that the prior art neither teaches nor suggests a process for producing GDP-sugar or UDP-sugar as claimed in claims 1, 5, 15-16, 18-20, and 72. The closest prior art comprises the method of making said sugar nucleotides using sugar phosphates (for e.g. glucose-1-phosphate) as starting materials as opposed to the instant claimed method which comprises the use of plain sugars (for e.g. glucose, galactose etc.) as starting material.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

None of the claims are allowable.
